

Genome Sciences Seminar

Wednesday, 10.28.20 | 3:30 | held remotely

<https://depts.washington.edu/gstrestrc/remote.htm>

Dr. Arjun Raj

Professor of Bioengineering and of Genetics
University of Pennsylvania

“Emergent cellular ecosystems in melanoma revealed by single cell analysis”

The Raj Lab is interested in building a quantitative understanding of cellular function. We like to develop new tools for quantifying biological processes based on imaging and sequencing and then use those techniques to help us answer questions in molecular and cellular biology.
