

Genome Sciences Seminar

Wednesday, 5.4.22 | 3:30 | Foege Auditorium

remote viewing option: <https://depts.washington.edu/gstrestrc/remote.htm>

Dr. Doris Bachtrog

Professor
UC Berkeley

“Tales of the Y chromosome: heterochromatin, aging, and conflicts”

Our research focuses on the processes that have shaped the evolution of sex chromosomes and the emergence of new species. We integrate data from a variety of fields, such as population biology, comparative and functional genomics, developmental genetics, chromatin biology, epigenetics, and aging.
