

# Genome Sciences Seminar

Wednesday, 11.15.17 | 3:30 | Foege Auditorium

---

## Dr. Agata Smogorzewska

Associate Professor

The Rockefeller University

<http://lab.rockefeller.edu/smogorzewska/>

## “Genome maintenance during DNA replication”

### Smogorzewska Lab:

Throughout its lifetime, a cell’s DNA is under constant metabolic and environmental assault leading to damage. Left unchecked, the resulting genome instability initiates cancer and other disorders. Using Fanconi anemia and other genetic disease as a backdrop, Dr. Smogorzewska’s research aims to elucidate pathways that prevent stem cell dysfunction, and cancer development, with a focus on those that repair DNA.

---

Refreshments served outside the Auditorium at 3:20pm
