The Institute for Human Genetics, UCSF, invites applications for two faculty positions at the Assistant, Associate or Full Professor level, Ladder Rank or In Residence, with an appointment in an appropriate UCSF department. Applicants with backgrounds in all aspects of human genetics will be considered, although informatics, computational genetics/genomics, human population genetics, statistical genetics or genetic epidemiology will be given special consideration for one position and experimental research for the other. Outstanding laboratory and/or computational space within the Institute for Human Genetics at the Parnassus Campus and a generous start-up package will be available.

The UCSF Institute for Human Genetics serves as a focal point for campus-wide activities in human genetics and has outstanding faculty members engaged in human genetics research spanning the four schools; Medicine, Nursing, Pharmacy and Dentistry. The major aim of the Institute is to create an exciting, productive and collaborative environment for research, training and clinical application in human genetics, and to provide institutional support and resources, such as the Genomics Core Facilities, for faculty research and for teaching in a number of UCSF graduate and medical school programs.

Candidates should have a doctoral degree (Ph.D., M.D.) and postdoctoral research experience completed in an area associated with Human Genetics. The new faculty member will be expected to teach in graduate programs affiliated with the Institute for Human Genetics and to establish an independent research program that will attract and maintain extramural funding.
Please send a CV, a brief description of research interests, and names of three references to Nadav Ahituv c/o Lynn Duncan at duncanl@humgen.ucsf.edu. We will start reviewing applications and interviewing candidates from January 15th.

UCSF seeks candidates whose experience, teaching, research, or community service has prepared them to contribute to our commitment to diversity and excellence. UCSF is an affirmative action/equal opportunity employer. The University undertakes affirmative action to assure equal employment opportunity for underutilized minorities and women, for persons with disabilities, and for covered veterans. All qualified applicants are encouraged to apply, including minorities and women.
