Postdoctoral Opportunity in Genetic Epidemiology at University of Washington, Seattle, WA

Job description

One postdoctoral position in genetic epidemiology at the University of Washington with start date early 2016 is available. The successful candidate will work on projects in genetic epidemiology with special emphasis on cancer. Ongoing projects include heritability, genome-wide association, fine-mapping and gene-environment interaction studies.

Qualifications

The successful candidate should have a PhD or doctoral degree in epidemiology, biostatistics, bioinformatics, computational biology, or related fields. Ability to work within a UNIX OS (preferably in C/C++, PERL) and standard statistical software like R is required. The successful applicant is expected to have a strong interest in genetic epidemiology and have experience in analyzing large-scale genomic datasets. The successful applicant will be based in the Department of Epidemiology at the University of Washington.

Please send CV, a brief research statement and list of three references to: Sara Lindstroem at saralind@uw.edu

The University of Washington is an affirmative action and equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, age, protected veteran or disabled status, or genetic information.
