

Combi Seminar

Wednesday, 10.13.21 | 1:30

held remotely: <https://depts.washington.edu/gstrestrc/remote.htm>

Dr. Jesse Bloom

Fred Hutchinson Cancer Research Center

“Interpreting the evolution of SARS-CoV-2”

We study the evolution of proteins and viruses, with a special focus on influenza. We use a mix of experimental and computational approaches to study how viruses evolve in the face of different selection pressures, and to understand the public-health consequences of viral genetic variation.
