

TOO CREATIVE FOR SCIENCE?

with Dr. Ahna Skop

PROFESSOR OF GENETICS, UNIVERSITY OF WISCONSIN-MADISON

A talk for graduate students, postdocs, and faculty. Dr. Skop asks, "Can the blending of art and science encourage a more diverse population of students to pursue science and improve the public understanding of science?" She will give the audience an exciting glimpse into her life and how she has impacted, science, education, and the public with her two passions, science and art.
