

Genome Sciences Seminar

Wednesday, 5.29.24 | 3:30 | Foege Auditorium

remote viewing option: https://depts.washington.edu/gsrestrc/remote.htm

Dr. Rajiv McCoyAssistant Professor, Department of Biology
Johns Hopkins University
https://mccoy-lab.org/

"Human genome evolution within and across generations"

The McCoy lab uses computational and statistical approaches to investigate the evolution and function of human genomes. Specific research interests relate to understanding the functional and fitness consequences of genetic variation—including large-scale chromosome abnormalities. We are also interested in the evolutionary processes that generate and maintain functional genetic variation in human populations.

Questions? Contact Brian Giebel at bgiebel@uw.edu or visit the Seminar website at http://www.gs.washington.edu/news/seminars.htm

The University of Washington is committed to providing access, equal opportunity and reasonable accommodations in its services, programs, activities, education and employment of individuals with disabilities. To request disability accommodations contact the Disability Services Office at least ten days in advance at: 206.543.6450/V,206.543.6452/TTY, 206.685.7264 (FAX), or e-mail at dso@u.washington.edu
