“Phylogenetic insights into Ebola dynamics in the unobserved reservoir”

We use large datasets to uncover how processes within infected hosts and across continents shape pathogen diversity and impact human health. In the lab we rely on genomic sequencing, computational biology, and phylogenetics to decode past events and understand current trends in virus evolution and epidemiology.

Questions? Contact Brian Giebel at bgiebel@uw.edu or visit the Combi website at <http://www.gs.washington.edu/news/combi.htm>

The University of Washington is committed to providing access, equal opportunity and reasonable accommodations in its services, programs, activities, education and employment of individuals with disabilities. To request disability accommodations contact the Disability Services Office at least ten days in advance at: 206.543.6450/V, 206.543.6452/TTY, 206.685.7264 (FAX), or e-mail at dso@u.washington.edu
