

THE INTERPLAY of TECHNOLOGY + BIOLOGY

In honor of Stan Fields

4/25/88 Construct general activation plasmid

To construct

P_{ADH} N.S. GALY (Bgl II) T_{ADH}
74-881
(AAHS)

- 1) Destroy Bgl II sites in AAHS
- 2) Insert GAL fragment into 1)

Bgl II sites flank LEU2 insert of AAHS.
Cut Bgl II, RH-in, religate
Transform MHY to Leu⁺ or
screen amp^r for Leu⁺

GENOME SCIENCES

SYMPOSIUM 2025

David Baker | University of Washington

Jef Boeke | New York University

Barak Cohen | Washington University

Virginia Cornish | Columbia University

Prashant Mali | UC San Diego

Srivatsan Raman | University of Wisconsin

Jay Shendure | University of Washington

Christina Smolke | Stanford University
